Date: 27-March-18

To,

Mahindra and Mahindra Ltd

Truck and Bus Division, Mumbai

Sub- BLAZO37 BS4 vehicle Performance

I am Kapoor Singh and our organization name is Kuldip Roadlines-Kalamboli. We are having 146 trucks, in which TML 113No's 3718/4018/4923 & Blazo37 31No's and BB 2No's 4023. Our vehicles are operating in steel segment (Steel coil) in major routes Mumbai to Hariyana/Delhi.

We are getting good millage in our regular routes 3.28 KMPL in both side load and ad blue consumption also less (2.5% against fuel consumption).

The engine power is excellent in Blazo and hence able to carry more loads in the vehicle and the designation before expected time. A part from sturdy Engine, Gearbox and differential, aggregates like, Clutch/Break liner are robust performing well. Drivers are happy with cabin comfort and drivability.

My drivers are very much appreciating about Mahindra call center (NOW 24/7) which is given guaranteed benefits to them. The repose of call center is very cordial and fast. Also they update regularly about the breakdown status.

Multimode technology very good for us during empty condition it's give extra befits to our business and fully comfort cabin to drive the with effortless.

My initial experience good with Blazo and I recommended to other customers.

Regards,

M/S. Kuldip Roadlines
