To,  
Mahindra trucks and Buses Ltd.  
Ahmadabad.

Our firm Multichem Corporation and sister concern Navigators Logistics Co. Pvt. Ltd. are having total fleet of around 30 vehicles.

*Out of total 30 vehicles, we have 12 Mahindra vehicles (10 - MN 31 and 2 – Blazo 37) which are being used for transportation of Acids, Chemicals and Solvents.*

Recently, load trial of our Blazo 37 was arranged by Mahindra team on the route of Gandhidham-Bawal-Gandhidham with one side load and one side empty. Total material was loaded 25.690 MT. Total distance covered was 1940 Kms and total fuel consumption was 443 Ltrs giving us Fuel avg. of 4.38 Km/ ltr. This fuel avg. is even better than what we are getting with other company's 31 MT capacity vehicles.

The experience with Blazo 37 Multimode performance is very satisfactory and our drivers very happy with product performance and better cabin facility due to which our TAT and fuel efficiency has been increased.

With our experience we have found that Blazo 37 Multimode is really good product and very much suitable for our chemical transportation application.

For, MULTICHEM CORPORATION
