

## **Strengthening Partnerships Across Borders with Mahindra Truck and Bus- Loading OPTIMO BS6**

Mahindra Truck and Bus continues to expand its global footprint by delivering reliable and efficient mobility solutions that empower businesses to grow with confidence. Reinforcing this commitment, Mahindra Truck and Bus recently delivered the robust Loading OPTIMO BS6 to two valued customers in Nepal- Tarkeshwor Pvt. Ltd. and B & S Hardware Pvt. Ltd.

The delivery marks another milestone in our journey of building strong cross-border partnerships and supporting enterprises with dependable transportation solutions tailored for modern business needs. Designed for superior performance, fuel efficiency, and reliability, the Loading OPTIMO HSD Cargo BS6 is engineered to redefine efficiency in both intercity and intracity goods transportation. Built to navigate busy urban roads and long highway stretches with ease, the vehicle combines a compact cabin width with smart vehicle architecture, enabling effortless movement through narrow lanes and congested routes. Delivering best-in-class mileage, it helps fleet owners and transport operators reduce operating costs and maximize profitability, while the advanced iMAXX telematics technology further enhances fleet management through smart vehicle tracking, performance monitoring, and operational insights.

As businesses across Nepal continue to evolve, Mahindra Truck and Bus remain committed to enabling progress through advanced commercial vehicles that deliver performance, durability, and value.
