**Sub: - Regarding BLAZO 37T BS4, Tag lift axle vehicles performance & Satisfaction Letter**

Sir,

We SCM Roadways Bhopal based truck fleet operating in Cement Bags application in between Damoh to Mandla, Bhopal, Sagar, Seoni, Sehore & Chhatarpur having a Fleet strength of 55 vehicles. I have added 15 no's of Blazo37T BS4, Tag Lift Axle to my fleet, all Blazo vehicles has covered 20000km recently and it is proving to be in all aspects when compared to competitor vehicles.

Earlier we used to have a fixed fleet mileage of 3.15kmpl and now we have increased it to 3.65kmpl which is 13% increase in fleet FE average contribution to 480lts of fuel saving / vehicle for 7,000kms

Divers are very much happy with the comfort level and safety. Latest technology like diligence and more space in cabin are very useful and help the driver to increase performance before even trip is completed,

Aggregate life of Mahindra vehicles as like Engine, Gear Box, Clutch, Differential & Tire life are also robust and lesser failure than another competition vehicles.

I will surely recommend this product to other transporters and willing to purchase more vehicles from Mahindra in future.

A well- organized service interval of Blazo 37T vehicle 60,000 KMTS is giving lower maintenance cost.

In overall I am satisfied with the product and support provided and looking for a long term relationship with Mahindra & Mahindra truck & bus Ltd.

FOR: - SCM Roadways Bhopal

Thanks & Regards
